

## MEMO

To: Asante and Community Healthcare Providers  
From: Michelle Rowe, Special Chemistry Technical Specialist  
Date: February 12, 2024  
Subject: Tissue Transglutaminase testing

---

We are pleased to announce that starting February 20th, Tissue Transglutaminase IgA testing will be performed at Asante. The new test code will be LAB1235618. Testing will be performed Monday and Thursday with results expected by the end of the day.

With this update in testing, the Tissue Transglutaminase Antibodies (LAB5179) performed at Mayo Clinical Laboratories will become unavailable.

The new Tissue Transglutaminase Antibodies (LAB1235637) panel will become available and include our inhouse tTg-IgA test as well as tTg-IgG (LAB1232270) performed at Mayo. Results for the new panel will look different since they will now be on two separate sheets.

For up-to-date testing information please reference our online test catalog at [asantelab.testcatalog.org](https://asantelab.testcatalog.org).

If you have any questions about this testing update, please contact the Laboratory Marketing Specialist at 541-789-4187 or [garrett.syphers@asante.org](mailto:garrett.syphers@asante.org).
